

benefits of WPC decking

PART OF OUR COVERBOARD RANGE

Our decking blends the strength of timber with the durability of plastic. The synergy of these materials helps to make the finish slip-resistant, easy to maintain & it won't splinter, warp or rot.

highly durable

We are proud of the fact that much of the plastic used in our WPC decking is sustainably sourced, recycled plastic. It also does not require the typically harmful chemicals used on timber decking to keep it clean & maintained.

eco friendly

Our decking comes in easy to handle parts which makes installation quick & simple. The PVC fastening clips are durable, flexible, & detachable so that installation is hassle-free without compromising structural strength.

easy to install
